

Exacto™ cold snare

listening...and delivering solutions®

The only purpose-built cold snare for diminutive polypectomy...

The unique snare design offers more control for placement around diminutive polyps and a precise, clean cut.

Exacto™ cold snare actual size

Supporting the cold snaring technique, the Exacto™ cold snare...

- Enables a clean cut, with a braided snare wire that is 33% thinner than traditional braided wires
- Features a unique design that is smaller than any available mini snare, providing more control for placement and resection
- May help reduce polyp “fly away” from the resection site, due to the thinner snare wire diameter

For more information on the Exacto™ cold snare, contact US Endoscopy today.

product number	description	sheath diameter (mm)	length (cm)	approximate snare size (mm)	units per box
