Profile

US Endoscopy, a division of STERIS Corporation, is a fast-paced new product development company with 400+ employees. As a world leader in endoscopy device design and manufacturing, we service the U.S. and international GI endoscopy markets. We work closely with physicians and nurses worldwide to deliver solutions that address everyday clinical challenges faced by our Customers. From advanced polypectomy, electrosurgery and GI emergency devices, to infection control solutions, we are continuously developing new innovations to improve patient care.

Mission Statement

At US Endoscopy, we partner with GI Customers around the globe to deliver innovative solution-oriented products, services and education that improve patient outcomes. The foundation of our culture is trust, mutual respect and collaboration – encouraging one another to grow and positively impact our business and Customers every day.
